

Address

26 Pennywell Rd.
St. John's, NL
A1C 2K9

Profile

Naming variables since 2014, I've had the pleasure of working with so many wonderful and brilliant developers on a number of different projects. I had no idea that "Hello, world" would lead to such amazing things.

When I'm not sitting at a computer, you'll usually find me playing music, hanging out with my lovely girlfriend and our dog or building guitar pedals.

May 2016

Contract Web Developer

Freelance

Designed, built and deployed websites for companies including Rockway Building Supplies, ComSpec and goTOMovers Ltd. using Vue, React and the WordPress REST API.

November 2018

Plexxis Software

Full stack developer

Designed and rebuilt a large software suite with React, Styled Components and MobX. Conducted extensive performance audits, eliminating wasted renders, reducing runtime complexity and optimizing data structures.

November 2019

Verda Innovations

Full stack developer

Built multiple client portals in Nuxt with Vuex state management. Queried Firebase with cloud functions and TypeScript.

March 2022

Bronson Telecom Ltd.

President & CTO

Designed and built marketing website in Nuxt and handled automation and utilities with Python. Created brand and logo design for marketing materials.

What am I up to now?

I'm currently working as a contract developer on some exciting and innovative projects involving artificial intelligence, machine learning and game development.

- Frontend
- Backend
- Design
- Dev Ops
